Open Strong, Close the Loop

- Open with the client's problem, not “Hi, my project is…”
- End by tying your system back to that problem
- Rehearse it out loud, with a timer
- Expect “why” questions. Have your reasons ready.

How to Show It

- Mockups, not process clutter
- A few things per slide. Use more slides.
- Give every slide time, chapter slides too
- Send me your PDF ahead: it all runs from my laptop
- Dress like you're meeting a client

Build It in Your Own Deck Template
